*Cycling and Cinema Jun 18 2022* A unique exploration of the history of the bicycle in cinema, from Hollywood blockbusters and slapstick comedies to documentaries, realist dramas, and experimental films. *Cycling and Cinema* explores the history of the bicycle in cinema from the late nineteenth century through to the present day. In this new book from Goldsmiths Press, Bruce Bennett examines a wide variety of films from around the world, ranging from Hollywood blockbusters and slapstick comedies to documentaries, realist dramas, and experimental films, to consider the complex,

shifting cultural significance of the bicycle. The bicycle is an everyday technology, but in examining the ways in which bicycles are used in films, Bennett reveals the rich social and cultural importance of this apparently unremarkable machine. The cinematic bicycles discussed in this book have various functions. They are the source of absurd comedy in silent films, and the vehicles that allow their owners to work in sports films and social realist cinema. They are a means of independence and escape for children in melodramas and kids' films, and the tools that offer political agency and freedom to women, as depicted in films from around the world. In recounting the cinematic history of the bicycle, Bennett reminds us that this machine is not just a practical means of transport or a child's toy, but the vehicle for a wide range of meanings concerning individual identity, social class, nationhood and belonging, family, gender, and sexuality and pleasure. As this book shows, two hundred years on from its invention, the bicycle is a revolutionary technology that retains the power to transform the world.

Deception in Honolulu Feb 20 2020 Book 2 of The Bryant Family Chronicles begins with a

daring car chase through the streets of Sarasota. When it ends, people are dead. But why did this chase start in the first place? The Sarasota Sheriff Department starts its investigation. While this is underway, the Bryant Family head to Hawaii to help their long-time friend on a mysterious string of murders in Honolulu. The friend that requested their help is the Honolulu Police Chief. The Bryant's use their unique skill sets and hi-tech gear to search for clues. Eventually they discover an artifact from 1884 has a connection with several of the victims. A powerful Chinese triad also has interest in the artifact for dubious reasons. The Bryant family soon gets the triad's radar and chaos soon erupts. During all of this, the Bryant girls are working closely with some handsome male team members and romance stirs. But will they get to explore these new relationships or will the friction with the triad end any chance of happiness...or their lives? This fictional story is based true current events and on historical events. Great effort was taken in researching and listing the facts around the Hawaiian Royal family in the 1880's and 90's. The science mentioned in the book is state-of-the-art, and is developed in part

by the author's own technology company.

Leadership in Healthcare Sep 09 2021

Leadership in Healthcare opens up the world of leadership studies to all healthcare professionals. Physicians, nurses, and other healthcare professionals spend thousands of hours studying the science and technology of healthcare, and years or even decades putting into practice recent findings in molecular biology, clinical diagnostics, and therapeutics. By contrast, the topic of

leadership and the traits of effective leaders tend to receive remarkably little attention. Yet no less vital than an understanding of how to interpret diagnostic tests and design care plans is a grasp of healthcare's organizational side, including the operation of multidisciplinary care teams, academic departments, and hospitals. If patient care, education, research, and professional service are to thrive in years to come, we must do a better job of preparing healthcare professionals to lead effectively. Composed of insightful and thought-provoking essays on the key facets of leadership, this book is designed to meet the needs of several important constituencies, including educators of health professionals who wish to incorporate leadership into their educational programs; health professional organizations seeking to enhance their members' leadership effectiveness, and individual health professionals who wish to embrace leadership in their personal and professional lives. This book represents a vital resource for health professionals who wish to enhance the quality of leadership in health professions education, practice, and professional development. In addition to regularly caring

for patients, Richard Gunderman, MD PhD MPH brings to this discussion a wealth of personal experience in professional and organizational leadership.

Hunt for the Skinwalker Apr 23 2020 The author of the controversial bestseller *Brain Trust* brings his scientific expertise to the chilling true story of unexplained phenomena on Utah's Skinwalker Ranch -- and challenges us with a new vision of reality. For more than fifty years, the bizarre events at a remote Utah ranch have ranged from the perplexing to the wholly terrifying. Vanishing and mutilated cattle. Unidentified Flying Objects. The appearance of huge, otherworldly creatures. Invisible objects emitting magnetic fields with the power to spark a cattle stampede. Flying orbs of light with dazzling maneuverability and lethal consequences. For one family, life on the Skinwalker Ranch had become a life under siege by an unknown enemy or enemies. Nothing else could explain the horrors that surrounded them -- perhaps science could. Leading a first-class team of research scientists on a disturbing odyssey into the unknown, Colm Kelleher spent hundreds of days and nights on the Skinwalker property and experienced firsthand many of its

haunting mysteries. With investigative reporter George Knapp -- the only journalist allowed to witness and document the team's work -- Kelleher chronicles in superb detail the spectacular happenings the team observed personally, and the theories of modern physics behind the phenomena. Far from the coldly detached findings one might expect, their conclusions are utterly hair-raising in their implications. Opening a door to the unseen world around us, *Hunt for the Skinwalker* is a clarion call to expand our vision far beyond what we know.

Bike Boom Nov 30 2020 Bicycling advocates envision a future in which bikes are a widespread daily form of transportation, but this reality is still far away. Will we ever witness a true "bike boom" in cities? What can we learn from past successes and failures to make cycling safer, easier, and more accessible? In *Bike Boom*, journalist Carlton Reid uses history to shine a spotlight on the present and demonstrates how bicycling has the potential to grow even further, if the right measures are put in place by the politicians and planners of today and tomorrow. He explores the benefits and challenges of cycling, the roles of infrastructure and advocacy, and what we can learn from cities that have successfully

supported and encouraged bike booms. In this entertaining and thought-provoking book, Reid sets out to discover what we can learn from the history of bike "booms."

*U.S. Marines In Vietnam: The Landing And The Buildup, 1965* Feb 02 2021 This is the second volume in a series of chronological histories prepared by the Marine Corps History and Museums Division to cover the entire span of Marine Corps involvement in the Vietnam War. This volume details the Marine activities during 1965, the year the war escalated and major American combat units were committed to the conflict. The narrative traces the landing of the nearly 5,000-man 9th Marine Expeditionary Brigade and its transformation into the II Marine Amphibious Force, which by the end of the year contained over 38,000 Marines. During this period, the Marines established three enclaves in South Vietnam's northernmost corps area, I Corps, and their mission

expanded from defense of the Da Nang Airbase to a balanced strategy involving base defense, offensive operations, and pacification. This volume continues to treat the activities of Marine advisors to the South Vietnamese armed forces but in less detail than its predecessor volume, *U.S. Marines in Vietnam, 1954-1964; The Advisory and Combat Assistance Era*.

Parent Child Journey Feb 14 2022 Author, pediatrician, and developmental-behavioral expert Dan Shapiro, MD, divides his new parenting guide, Parent Child Journey, into ten different "miles." Each mile represents an interactive session that brings you closer to understanding your child's behavior and learning effective strategies. The first mile includes the "Gander," an assessment tool Shapiro developed to help describe your child's developmental profile-and yours too. Respecting the different learning styles of children and parents, he presents the Gander in a variety of ways: as a standard rating scale with explanatory text, but also as a picture, a song, and a map. Then, Shapiro takes parents through nine other sessions, continuing to present

his evidence-based training program as a uniquely creative integration of standard discussion, real-life vignettes, richly illustrated fable, worksheets, and homework assignments. Throughout *Parent Child Journey*, Shapiro emphasizes, "Just because your child's behavior may be complicated, does not mean it is incomprehensible." *Parent Child Journey* combines serious help with whimsical presentation—supporting and teaching parents, even as it engages and entertains. With this comprehensive new guide, Shapiro reassures parents that they are not alone on this journey.
